We ship the year round. Orders acknowledged and booked during freezing weather.

Suggestions on Care of African Violets

Make use of North and West exposures during summer, South and East in winter.

Violets like a night temperature of 68 degrees. Avoid draughts.

Use tepid water always, rain or spring water preferred. **Plant food** should be used to keep your plants in a healthy growing condition. Place pots in saucer and water from below. Do not overwater.

Use **Optox** spray occasionally, specific directions on every package to keep plants clean and free from disease.

When repotting use **certified soil** and do not overpot.

Keep pots in proportion to size of plants. Demands of the African Violet are few but must be constant. Such a handsome flowering plant is well worth a little extra trouble. You are cordially invited to visit our greenhouses.

Yours for More Beautiful Violets,

TINARI FLORAL GARDENS

African Violet Accessories make ideal
XMAS GIFTS. Holiday wrapped at your
request.
